

Special Pathology

1. Systemic hypertension
2. Degenerative diseases of arteries
3. Aneurysms. Aortic dissection
4. Vasculitides
5. Diseases of veins and lymphatics
6. Congenital heart defects
7. Diseases of the endocardium
8. Valvular defects
9. Ischemic heart disease
10. Cardiomyopathies and myocarditis
11. Diseases of the pericardium. Cardiac changes in systemic and pulmonary hypertension
12. Disorders of erythrocytes
13. Bone marrow suppression and aplastic anemia. Bone marrow transplantation
14. Lymphadenitis and lymphadenopathy
15. Non-neoplastic diseases of the spleen
16. Thrombocytopenia and thrombocytopathies
17. Coagulopathies. Vasculopathic hemorrhagic diatheses
18. Disseminated intravascular coagulation
19. Congenital malformations of the nasal cavity, paranasal sinuses, pharynx, and larynx
20. Inflammations of the upper respiratory tract and larynx. Middle ear infections
21. Pulmonary malformations. Atelectasis and pulmonary collapse. Acute respiratory distress syndrome
22. Diseases of the pulmonary circulation
23. Chronic obstructive pulmonary diseases
24. Interstitial pulmonary fibrosis
25. Granulomatous lung diseases. Pneumoconioses
26. Bacterial pneumonias
27. Viral pneumonias
28. Mycotic lung diseases. Pulmonary tuberculosis
29. Pathological contents of the pleural cavity. Pleuritis
30. Non-neoplastic diseases of the mediastinum. Non-neoplastic diseases of the thymus
31. Congenital malformations of the oral cavity, face, and teeth

32. Stomatitides. Hyperplastic lesions of the oral cavity
33. Dental caries and its complications
34. Jaw cysts
35. Non-neoplastic diseases of the salivary glands
36. Malformations of the gastrointestinal tract
37. Achalasia. Hiatal hernia. Esophageal diverticula. Esophageal varices
38. Esophagitis
39. Gastropathies and gastritides. Gastroduodenal ulcer disease
40. Vascular disorders of the intestine
41. Malabsorption syndrome
42. Infectious enteritides
43. Idiopathic intestinal inflammations. Other non-infectious enteritides
44. Appendicitis. Diverticula and diverticulitis
45. Alterations of position and lumen of the intestine
46. Pathological contents in the abdominal cavity. Peritonitis
47. Hernias and prolapses
48. Malformations of the liver and bile ducts
49. Liver cirrhosis
50. Hepatitis
51. Toxic liver injury
52. Non-alcoholic fatty liver disease (metabolic syndrome). Congenital metabolic liver disorders
53. Non-neoplastic diseases of intrahepatic and extrahepatic bile ducts
54. Circulatory disorders of the liver
55. Cholelithiasis. Cholecystitis. Cholangitis
56. Malformations of the pancreas. Cystic fibrosis of the pancreas
57. Pancreatitis
58. Clinical syndromes of renal impairment. Types and mechanisms of glomerular injury
59. Glomerulopathies presenting with proteinuria or nephrotic syndrome
60. Glomerulopathies presenting with hematuria
61. Glomerulopathies presenting with acute nephritic syndrome
62. Rapidly progressive glomerulonephritides
63. Vascular diseases of the kidney
64. Renal diseases affecting tubules and interstitium

65. Malformations of the urogenital system
66. Non-neoplastic diseases of the urinary tract
67. Inflammations of the penis
68. Non-neoplastic diseases of the testis
69. Non-neoplastic diseases of the prostate
70. Non-neoplastic diseases of the vulva
71. Non-neoplastic diseases of the vagina
72. Non-neoplastic diseases of the cervix
73. Non-neoplastic diseases of the endometrium
74. Non-neoplastic diseases of the fallopian tubes. Non-neoplastic diseases of the ovaries
75. Ectopic pregnancy. Eclampsia and other maternal complications of pregnancy and delivery
76. Diseases of the placenta, umbilical cord, and fetal membranes
77. Developmental disorders of the breast. Mastitis. Non-neoplastic localized breast lesions
78. Cerebral edema. Hydrocephalus. Intracranial hypertension
79. Disorders of neurogenesis. CNS trauma
80. Cerebrovascular diseases
81. Neuroinfections
82. Prion diseases
83. Demyelinating diseases of the CNS
84. Metabolic and toxic encephalopathies
85. Neurodegenerative diseases
86. Pharmaco-resistant epilepsy
87. Non-neoplastic diseases of the eyelids and eyeball. Glaucoma
88. Peripheral neuropathies. Diseases of the neuromuscular junction
89. Myopathies
90. Bone malformations. Developmental defects of joints
91. Osteoporosis. Fractures. Osteonecrosis
92. Metabolic osteopathies
93. Osteomyelitis. Tuberculosis of bone. Paget's disease of bone
94. Osteoarthritis. Spondylosis and spondylarthrosis
95. Arthritis
96. Hyperpituitarism and hypopituitarism. Neurohypophyseal syndromes

97. Adrenal disorders
98. Thyroid dysfunctions
99. Developmental disorders of the thyroid gland. Thyroid hyperplasia. Thyroiditis
100. Disorders of the parathyroid glands
101. Diabetes mellitus
102. Non-infectious lichenoid and psoriasiform dermatitis/dermatoses
103. Non-infectious spongiotic and bullous dermatitis
104. Granulomatous dermatitis. Vascular skin diseases
105. Infectious dermatitis. Inflammatory diseases of the skin and subcutis
106. Prematurity of newborns and fetal pathology before birth
107. Birth injuries of the fetus
108. Disorders of postnatal adaptation. SIDS
